The appointment committee is required to give equal consideration to the distribution of populations within the district.

According to the Wisconsin Technical College System, this has been interpreted to mean:

- Male/Female Representation** – members of each gender (male/female) must hold at least three (3) positions on a District Board.
- Minority Representation** – must reflect the distribution of minorities within a district. While all districts are encouraged to have minority representation on their District Boards, if the total percentage of minorities within the district exceeds 6.5%, at least **one minority** must hold a position on the District Board.

Note: WITC's most recent estimated minority population is 6.6% (2017).
