

Health and Wellness Services

The College Health Nurse provides and/or coordinates a variety of essential health/safety/wellness services to both students and staff. College health nursing is directed toward enhancing the educational process by modifying or removing health-related barriers to learning, promoting optimal wellness, enabling individuals to make decisions about health-related concerns, and empowering students and staff to be self-directed and well-informed consumers of health care service. ATODA (Alcohol, Tobacco, and Other Drug Abuse) information is available from the College Health Nurses, Campus Counselors, and in the Learning Resource Centers.

Alcohol, Tobacco, and Other Drug Abuse (ATODA) Prevention

Whether a student personally abuses chemicals or is affected by someone who does, alcohol, tobacco, and other drug abuse education, referral, and recovery support assistance is available at WITC. You can learn about chemical dependency using materials in the Learning Resource Center (LRC), or by contacting a member of the local Campus Wellness Team.

Tobacco-Free College

Board policy bans tobacco use in any form, in all WITC facilities. This policy maintains a healthy environment for students, staff, and visitors and complies with the state Clean Indoor Air Act, Section 101.123. Students using tobacco products within the WITC facilities are subject to disciplinary actions.

Student Handbook

The College publishes a Student Handbook that each student should consult and review carefully. The handbook contains further information regarding resources that address students' questions, student code of conduct, policies and procedures, information about facilities and services for students, student activities, and other important information that the student may need while attending Wisconsin Indianhead Technical College. The Student Handbook/Planner will be available for each student and can be accessed on the college's Web site at witc.edu.

Online and Other Learning Options

Online Instruction

Courses are available in a virtual environment where you can access class assignments, participate in online discussions with classmates, meet virtually with your instructor, and get feedback on your performance.

eTech College of Wisconsin

The 16 colleges of the Wisconsin Technical College System have combined their educational strength and created eTech College of Wisconsin. eTech College of Wisconsin provides learners with more options and greater access to the Wisconsin Technical Colleges' online courses, certificates, and programs. For more information, go to etechcollege.org.

Interactive Television/Internet Protocol Video (ITV/IPV)

You can access ITV/IPV classroom courses at a variety of sites including WITC campuses, branches, and learning centers, high schools, and other sites that are a part of WITC's network. Classmates from multiple locations interact with each other and the instructor via video and audio. This allows an option similar to a traditional classroom while reducing the time of traveling to the originating campus.

Flex Lab

Flex Labs provide an alternative to the traditional classroom offering a variety of courses that enable the self-motivated, self-disciplined individual to acquire knowledge and skills leading to job advancement, college credit, and personal enrichment.

The Flex Lab gives the opportunity to learn at an individual pace. Familiar material can be reviewed quickly, allowing you to focus on new topics. Students don't have to sit through lectures on materials already known or be left behind on more advanced topics. The instructor is available to help on an individual basis when problems or questions arise.
