

Grade Columns Toolbar Explanation [\(top\)](#)

You can only HIDE the uncalculated columns such as **Last and First Name, Username, Last Access and Availability**

- > Column Information
- > Modify Column
- > Hide Column
- > Column Statistics
- > Set as External Grade
- > Remove Column
- Close Menu

Column information gives you information such as category, whether it is included in the grade calculations, and primary display

Modify Column allows you to change important information and display

Hide Column removes it from the grade center view. To show this column again you need to go to the organize grade center area

Column Statistics shows statistics, status distribution and grade distribution of that graded work you to change important information and

Set as External Grade will show students their score for that column in a module on the Blackboard tab

Remove Column permanently deletes the column and any grades in it
