

The Grade Center toolbars: [\(top\)](#)

The grade center has three different working toolbars that instructors will interact with: All of them have the chevron icon that hides a drop down listing of what can be done with each tool. The one pictured above allows the instructor to interact with the grade center in a broad capacity and affect large portions of the center itself.

This toolbar is below the first one and allows instructors to affect the way the grade center looks.

This tool bar allows the instructor to directly affect the grades, the order of students' names and information, and how they are presented or modified
