

## Computer Skills Inventory

The Dental Assistant (DA) program relies heavily on digitally-based information sharing through the use of a computer and the internet. Basic skills such as word processing, internet-accessed information, and emailing are an absolute necessity for all Dental Assistant students. All Dental Assistant core courses include a Blackboard internet-based classroom to disseminate course information, documents, syllabus, learning plans, assessments, and student grades. The instructor and college will **exclusively use** the student WITC email account for digitally-shared information.

Please self-assess your ability to perform the following computer skills. If you do not feel competent in any of the following skills please seek assistance to learn these basic skills. Continuing education for basic computer skills can be found [online here](#).

Computer Skill	<input checked="" type="checkbox"/> I am competent
Create, edit, and save a document in Microsoft Word	
Attach a Microsoft Word document to an email	
Detach and save a Microsoft Word document from an email
